Keshav Jindal

Software Engineer — Backend, Cloud-Native & AI Systems

Phone: +91 8368317466 **Email:** keshav.jindal.7029@gmail.com
LinkedIn: linkedin.com/in/keshav7029 **GitHub:** github.com/Keshavgg **LeetCode:** leetcode.com/u/XxKeshavxX/

EDUCATION

Maharaja Agrasen Institute of Technology (GGSIPU), New Delhi — Aug 2023 – May 2027
Bachelor of Technology in Computer Science and Engineering — **CGPA: 7.78**
Note: At least 1 semester remaining following the completion of summer 2026 internships.

EXPERIENCE

AI Engineer Intern, Special Projects Group (TLT) — Visa — Jun 2026 – Aug 2026

- Selected out of 440+ applicants to join the Technology Leadership Team (TLT) Special Projects Group, tasked with architecting backend components for high-availability core financial systems.
- Spearheaded the automation of critical workflows, including TLMP, RAF, and client intake forms, drastically reducing manual data entry and processing overhead.
- Conducted in-depth research on Goro APIs and successfully integrated these features into the backend infrastructure to enhance overall system capabilities.

AI Engineer Intern — Network People Services and Technologies — Jun 2024 – Aug 2024

- Engineered and managed an AI-driven chatbot for TimePay, enhancing automated customer support and query resolution.
- Handled the core backend development utilizing Spring Boot, ensuring scalable and efficient system performance.

PROJECTS

Multi-Agent AI Research System — *Python, LangChain, LLMs, Agentic Workflows*

- Architected an autonomous multi-agent research pipeline using LangChain, enabling specialized AI agents to collaboratively gather, synthesize, and summarize complex topics.
- Integrated external APIs and dynamic tool-calling capabilities, allowing agents to execute targeted web searches and cross-verify facts to streamline research workflows.

AI Video Assistant with RAG — *Python, RAG, Vector DB, LangChain, OpenAI API*

- Engineered a context-aware AI assistant utilizing Retrieval-Augmented Generation (RAG) to accurately answer specific user queries based on video transcripts and content.
- Optimized semantic search by embedding and indexing video data chunks into a Vector Database, significantly reducing LLM hallucinations and ensuring highly relevant responses.

ACHIEVEMENTS & COMPETITIONS

- **Data Structures & Algorithms:** Solved 500+ algorithmic problems on LeetCode, demonstrating strong proficiency in time-space complexity optimization and dynamic programming.
- **Engineering Excellence:** Consistently apply a growth mindset to troubleshoot root-cause technical bottlenecks, adapting quickly to new engineering methods and software tools.
- **Continuous Learning:** Proactively researching scalable architectures and modern cloud-native deployment strategies to improve product availability and reliability.

TECHNICAL SKILLS

Languages: C/C++, Java, Python, JavaScript, TypeScript, SQL, HTML/CSS
Backend & Cloud: Spring Boot, FastAPI, Node.js, Microservices, REST/GraphQL, Docker, Kubernetes (K8s), AWS (EC2, S3)
AI & Databases: Gen AI, RAG (Retrieval-Augmented Generation), LangChain, LlamaIndex, Vector DB (Pinecone), PostgreSQL, MongoDB, Redis, Kafka
Core Fundamentals: Data Structures & Algorithms (DSA), System Design, Object-Oriented Programming (OOP), Git/GitHub, CI/CD Pipelines
